

CLAIMS

1. A compound having a structure wherein structural units represented by the general formula (1) are bonded to
 5 one another without a linking group,

wherein, in the formula, X_1 to X_4 each independently represent an oxygen atom, a sulfur atom or NR_0 (wherein R_0 represents a hydrogen atom, or a substituted or
 10 unsubstituted monovalent organic group); Z_0 represents a tetravalent organic group; and * represents a bonding position.

2. The compound according to claim 1, comprising
 15 structural units represented by the general formula (2),

wherein, in the formula, Z_1 represents a tetravalent organic group; X_5 represents an oxygen atom, a sulfur atom or NR_0 (wherein R_0 represents a hydrogen atom, or a
 20 substituted or unsubstituted monovalent organic group);

and * represents a bonding position.

3. The compound according to claim 1 or 2, represented by the general formula (3),

5

... (3)

wherein, in the formula, Z_2 and Z_3 each independently represent a tetravalent organic group constituting a tetracarboxylic acid and its derivatives; X_6 and X_7 each independently represent an oxygen atom, a sulfur atom or
10 NR_0 (wherein R_0 represents a hydrogen atom, or a substituted or unsubstituted monovalent organic group); when X_6 is a nitrogen atom, X_6 may be bonded to R_1 for forming a ring structure; when X_7 is a nitrogen atom, X_7 may be bonded to R_2 for forming a ring structure; and R_1
15 and R_2 each independently represent a hydrogen atom, a substituted or unsubstituted aryl group, a substituted or unsubstituted alkyl group, a substituted or unsubstituted cycloalkyl group, a substituted or unsubstituted aralkyl group or a group selected from the group consisting of the
20 following general formula (4),

... (4)

wherein, in the formula, R_3 represents a substituted or unsubstituted aryl group, a substituted or

unsubstituted alkyl group, or a substituted or
unsubstituted cycloalkyl group.

4. An electrophotographic photoconductor containing at
5 least one kind of the compounds as described in any one of
claims 1 to 3.

5. An organic transistor containing at least one kind of
the compounds as described in any one of claims 1 to 3.

10

6. An organic solar cell containing at least one kind of
the compounds as described in any one of claims 1 to 3.

7. An organic electroluminescent device containing at

15 least one kind of the compounds as described in any one of
claims 1 to 3.
